

EXPERIMENT-2

Aim: Design of custom logo

Steps:

1. Create a new file with A4 size white background
2. Import an image
3. Use select to select the region of interest and use bucket tool to fill any colour of your choice
4. Now use invert colour option.
5. Adjust the hue and contrast of the image
6. Use ellipse select tool to select the area around the logo and delete the outer portion.
7. Export the final image as .jpg file.
