

EXPERIMENT-3

Aim: Design of a logo

Steps:

1. Create a new file with same height and width as previous and set the background colour to black
2. Use ellipse tool and press CTRL+SHIFT while holding mouse button to draw perfect circle
3. Convert selected circle as path
4. Write some text using the text tool
5. Select the whole text, and convert text to path to place the text on created path
6. Create a transparent layer to display the transformed text and fill the text with colour of your choice
7. Now, use the rotate tool to rotate the text and place it in desired position
8. Draw 2 concentric circles using ellipse tool and use select tool to select the path
9. Fill the different regions of logo with colours.
10. Save the file and export it as .jpg file.
