

EXPERIMENT-4

Aim: Design your own animation using GIMP.

Steps:

1. Create multiple images with different actions.
2. Open gimp, go to files menu and select open as layers.
3. Locate the images and select all the images you want in your animation.
4. Set the order of images using up and down movement keys.
5. Go to file menu and select “export as” and add .gif extension at the end of file name.
6. Select the “As animation” checkbox and set time gap between the frames.
7. Click on EXPORT button to create the gif.
